HUSAY[®]

Celebrate Success Template 2023

Blue light task creation and monitoring

Issue:

- Assembly teams have to fill out paper forms for blue light and deliver to materials team causing delays to production work
- Assembly teams and management have no visibility on the progress of the blue light request

Improvement Idea:

- Implement a tool for assembly team that creates a Material Issue task in Azure DevOps
- Create an automated Dashboard which shows number of Blue Lights per manufacturing location bay for Material team to monitor

Old Process

New Process

Implementation or Corrective Action:

- Created Blue Light request form which can be electronically filled out from any tablet/PC and uploads to Azure DevOps
- Created live dashboard to allow all teams to track the status of each Blue light

Project Number Project Number

Learnings and Savings:

- New process reduces impact on production
- · Provides visibility and data for each material issue
- Saves at least 15 mins per Material Issue Request

Amazing team

Digitizing the paper NC request form

Issue:

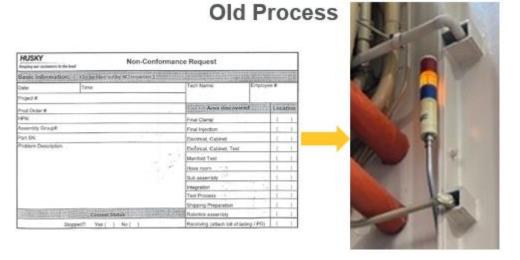

- Assembly teams have to fill out paper forms for NC request and deliver to QA office causing delays to production work
- Assembly teams and management have no visibility on the progress of a NC request

Improvement Idea:

- Implement a tool for assembly team that creates a NC request task in Azure DevOps
- Create an automated Dashboard which shows number of NC Requests per manufacturing location bay for Quality team to monitor

New Process

Implementation or Corrective Action:

- Created NC Request form which can be electronically filled out from any tablet/PC and uploads to Azure DevOps
- Created live dashboard to allow all teams to track the status of each NC request DevOps

Learnings and Savings:

- New process reduces impact on production
- Provides visibility and data for each material issue
- Saves at least 15 mins per NC Request
- Eliminates paper copies which allows us to reach closer to our TagetZero goal

Amazing team

Above and beyond engagement from the team: Big Thank You to: Nipun and Jade
